

WF-301 Eclipse

Self-adhesive, perforated window film

Application Glass and transparent surfaces

Use Primarily intended for exterior applications. Allows an image to be seen on the outside of glass while providing viewing through film perforations from inside.

Energy Efficiency Lessens air conditioning demand by reducing solar heat gain. Specific effectiveness impacted significantly by the color of printed graphics. Lighter colors and white provide greater reflection/benefit.

Material 60/40 micro-perforated vinyl, 40% transparency

Film Color White/Black

Roll Width 54"

Thickness 6 mil

Adhesive Pressure-sensitive, permanent

Installation Method Dry. 45°F minimum temperature of air and substrate.

Chemical Resistance Resists mild alkalis, mild acids, salt & water

Flammability Self extinguishing

Maintenance / Cleaning Mild dish soap and water

Storage Two-years at 72°F and relative humidity of 50-55%

Warranty Two years for exterior installations.
